

**What is claimed is:**      **CLAIMS**

1                    1(currently amended).      An arrangement for attaching a  
2      **showerhead** ~~shower head~~ holder in such a way ~~++~~ that its height will be  
3      adjustable, **comprising** ~~having~~ a wall-mounting longitudinal element in the  
4      form of **one of** a rod **and a** ~~or~~ wall-mounting rail, a **showerhead** ~~shower head~~  
5      holder that may be slid along the wall-mounting element, a guide for guiding  
6      the **showerhead** ~~shower head~~ holder along the wall mounting element, and at  
7      least one auxiliary guide for another **sanitary** ~~hygienic~~ item **besides a**  
8      **showerhead**, said auxiliary guide being independent of the primary guide **and**  
9      **the sanitary item being slidable independently of the showerhead holder**  
10     **along the auxiliary guide over a same sliding range as the showerhead**  
11     **holder.**

1                    2(currently amended).      An arrangement according to claim 1,  
2      **wherein** ~~where the~~ **at least one said** auxiliary **guide is** ~~guide(s) is/are~~ aligned  
3      parallel to the guide for the showerhead holder.

1                    3(currently amended).      An arrangement according to claim 1,  
2      **wherein at least one said** ~~where the shape(s) of the~~ auxiliary **guide has a**  
3      **shape that is** ~~guide(s) is/are~~ identical to **a shape** ~~that~~ of the guide for the  
4      showerhead holder over at least part of **respective lengths of the guide and**  
5      **the auxiliary guide** ~~their length(s).~~

1                    4(currently amended).      An arrangement according to claim 1,  
2      **wherein at least one said** ~~where the shape(s) of the~~ auxiliary **guide has a**  
3      **shape that is different** ~~guide(s) differ from~~ **a shape** ~~that~~ of the guide for the  
4      showerhead holder.

1           5(currently amended).     An arrangement according to claim 1,  
2     **wherein** ~~where~~ the guide for the showerhead holder faces forward and ~~the~~ **at**  
3     **least one said** auxiliary **guide faces** ~~guide(s) face(s)~~ sideward.

1           6(currently amended).     An arrangement according to claim 1,  
2     **wherein at least one said** ~~where the~~ auxiliary guide ~~(s) are~~ **is** arranged on **a**  
3     ~~the~~ rear surface of the wall-mounting **longitudinal element** ~~rod and/or in the~~  
4     ~~vicinity of the rear surface of the wall mounting rod.~~

1           7(currently amended).     An arrangement according to claim 1,  
2     **wherein at least one of** ~~where~~ the guide for the **showerhead** ~~shower head~~  
3     holder and ~~for the~~ **at least one said** auxiliary guide ~~(s) are~~ **is** configured **to**  
4     **form at least one** ~~in the form of a groove or grooves, preferably an undercut~~  
5     ~~groove or grooves.~~

1           8(currently amended).     An arrangement according to claim 1,  
2     **comprising** ~~having~~ a pair of **said** auxiliary guides ~~that are preferably~~  
3     ~~symmetrically arranged with respect to the primary guide.~~

1           9(currently amended).     An arrangement according to claim 1,  
2     **further comprising** ~~having~~ at least one wall bracket for attaching the wall-  
3     mounting **element** ~~rail~~ to a wall.

1           10(currently amended).    An arrangement according to claim 9,  
2     **wherein** ~~where~~ the wall bracket is configured such that it will not interfere with  
3     adjustments of the showerhead holder **along the sliding range**.

1           11(currently amended).    An arrangement according to claim 9,  
2     **wherein** ~~where~~ the wall bracket is configured **for attachment** ~~such that it may~~

3 ~~be attached~~ to the wall-mounting element ~~red (1)~~ anywhere along the wall  
4 mounting element ~~its length~~.

1 12(currently amended). An arrangement according to claim 9,  
2 wherein ~~where~~ the wall bracket engages in at least one said auxiliary guide,  
3 ~~and preferably engages both auxiliary guides~~.

1 13(currently amended). An arrangement according to claim 9,  
2 wherein ~~where~~ the wall bracket is designed to join two aligned ~~for joining~~  
3 ~~two coaxial~~ sections of the wall-mounting element ~~red~~.

1 14(currently amended). An arrangement according to claim 1, where  
2 the guide groove is configured as a groove sized to accommodate a ~~for~~  
3 ~~accommodating the~~ shower hose.

1 15(new). An arrangement according to claim 1, wherein at least  
2 one said auxiliary guide is arranged in a vicinity of a rear surface of the wall-  
3 mounting longitudinal element.

1 16(new). An arrangement according to claim 7, wherein the at least  
2 one groove is undercut.

1 17(new). An arrangement according to claim 8, wherein the pair of  
2 said auxiliary guides are symmetrically arranged with respect to the guide for  
3 the showerhead holder.

1 18(new). An arrangement according to claim 9, comprising two said  
2 auxiliary guides and wherein the wall bracket engages in both said auxiliary  
3 guides.

1           19(new).     A height adjustable mounting arrangement for a  
2 showerhead holder, comprising:  
3           a wall-mountable longitudinal element;  
4           a primary guide extending along at least part of the wall mountable  
5 longitudinal element, the primary guide defining a height adjustment range;  
6           a showerhead holder carried by the primary guide and arranged to slide  
7 along the wall-mounting element over the height adjustment range;  
8           at least one auxiliary guide extending along the wall mountable  
9 longitudinal element and defining a height adjustment range for an additional  
10 item besides the showerhead holder, wherein said auxiliary guide is  
11 independent of the primary guide and arranged for the additional item to be  
12 slidable independently of the primary guide for the showerhead holder, along  
13 at least part of the auxiliary height adjustment range of the additional item that  
14 overlaps the height adjustment range of the shower head;  
15           wherein the primary guide and the auxiliary guide are arranged such  
16 that the showerhead holder and the additional item can pass by one another  
17 in sliding along their respective height adjustment ranges.
